web eXercises®

Volume Licensing

Save your organization money with Multi-User Licensing

What Is Volume Licensing?

We recognize that most users at your facility need access to WebExercises® all the time. This is why we created the Volume Licensing (VL) Program. Volume licensing makes it easier and more affordable to deploy WebExercises to all providers within your organization.

What are the benefits of Volume licensing?

- *Saves you money.* Discounted prices for all users while simplifying license management.
- *All upgrades included.* Volume licensing includes free upgrades and content updates.
- *Easy implementaion.* Video tutorials can be accessed at any time and live webinars are held monthly.

Which Volume license is right for me?

We recommend each employee has their own username and password. For example, if you have 10 employees at your facility you would need a minimum of a 10 user volume license. This takes into account your full-time and part-time staff accessing the program.
A WebExercises licensing specialist can help you choose the right licensing program for you.

Minimum order quantities for Volume Licensing

Our Volume Licensing programs are for purchases of 3 or more users. Single user licenses may be converted to Volume license as well. Volume pricing requires annual subscription purchase.

Volume License

Volume licensing saves you money and helps you get more out of your investment instead of purchasing single user licenses.

- *Unlimited user session* Give your facility unlimited numbers of user login accounts and allow users to access WebExercises® simultaneously.
- *Affordable accessibility* Eliminate the need to purchase multiple single user licenses that can add up
- *24/7 Access anywhere, anytime* Have access to your whole database at any time from any internet enabled device.
